

TAX RATE 2010

This approach to the tax rate calculator is for qualified employers and shows tax rates before the addition of any Employment Administration Fund rates. The table below starts with information available from the Annual UI Tax Rate Notice. The Notice is sent to employers in December and shows both the UI tax rate and the benefit ratio for the next calendar year. The Notice also shows UI benefit charges and UI taxable wages for the past four experience (fiscal) years, which are used in determining the benefit ratio.

TAX RATE 2006

This approach to the tax rate calculator is for qualified employers and shows tax rates before the addition of any Employment Administration Fund rates. The table below starts with information available from the Annual UI Tax Rate Notice. The Notice is sent to employers in December and shows both the UI tax rate and the benefit ratio for the next calendar year. The Notice also shows UI benefit charges and UI taxable wages for the past four experience (fiscal) years, which are used in determining the benefit ratio.

2006 UI Tax Rates for Qualified Employers by Rate Class

(a) Rate Class	(b) Benefit Ratio (from Annual UI Tax Rate Notice)		(c) Experienced Rated Tax Rate	(d) Flat Social Cost Factor	(e) % Flat Social Cost Factor Assigned to Rate Class	(f) Graduated Social Cost Factor (Social Tax Rate) (d times e)	(g) Combined Tax Rate (c plus f)
